

TREES_{BLM5} Adopt a Tree Project

Name: _____

My Special Tree is _____

In this assignment you will learn more about your chosen tree, and prepare a poster about your tree to share with your classmates and other special people.

Step 1. Choose your tree, or talk to your teacher about which tree you will learn more about.

Step 2. Use the information provided by your teacher, library books, the internet, encyclopedias, or field guides to help you find the following important information about your tree.

1. Make a drawing of a leaf or needles from your tree.
2. Make a drawing of the fruit or cone from your tree.
3. Make a drawing of the tree as it might look standing in the forest.
4. How tall does your tree usually grow?
5. How old does it usually live to be?
6. What kind of soil does it like to grow in?
7. What is the wood of your tree used for when it is harvested?
8. What is the latin name for your tree.

When learning about your special tree and completing your assignment, make your illustrations as life-like as you can and provide good details in your responses. Learn as much as you can about your chosen tree so you can do a good job of sharing your knowledge with others.

Step 3. Carefully attach the good copies of your work onto a sheet of construction paper.

You have successfully completed your Adopt a Tree Project. Well done!
